

PRODUCTS UNDER MANDATORY BIS CERTIFICATION

Consolidated reference across BIS Compulsory Certification Schemes I, II, IV and X

BIS certification is generally voluntary, but the Central Government can make compliance with specified Indian Standards compulsory through Quality Control Orders (QCOs), regulations and other statutory instruments. For products brought under compulsory certification, manufacturers, importers, sellers and other covered entities must meet the applicable conformity-assessment requirements and use the prescribed BIS conformity mark or certification/registration mechanism. The BIS has expanded from traditional ISI Mark certification into multiple conformity-assessment routes, including product certification, compulsory registration and Certificate of Conformity / Scheme X arrangements.

What has changed in the BIS / Ministry, Government departments and ministries have progressively issued and amended QCOs covering a wider range of sectors such as steel, chemicals, electrical equipment, electronics and IT, footwear, textiles, furniture, cookware, machinery, renewable-energy equipment and consumer products. BIS now presents compulsory products through separate conformity-assessment schemes, while amendments, revisions, withdrawals, transitions and product-specific scope conditions are reflected in the live BIS register. The applicable requirement therefore depends on the exact product, Indian Standard, product scope and the operative government notification.

Important reference note: This document is intended as a practical compliance reference. The BIS compulsory-certification register is a live regulatory resource and product coverage can change through amendments, revised standards, withdrawals, exemptions and transition provisions. Always verify the exact product scope and applicable requirement on the official BIS compulsory-certification pages before relying on the entry for a compliance decision.

Scheme	Purpose / Route	Typical coverage
Scheme I	ISI Mark / product certification	Cement, steel, chemicals, electrical products, footwear, textiles, furniture, cookware, tools and many other QCO-covered goods.
Scheme II	Compulsory Registration Scheme	Electronics & IT goods, solar PV products, notified chemicals and textiles.
Scheme IV	Certificate of Conformity	Specified products such as transformer stampings/laminations/cores and bicycle retro-reflective devices.
Scheme X	Certification under Scheme X	Specified low-voltage switchgear/control gear and machinery/electrical equipment covered by the applicable technical regulations.

Regulatory Reference & Use

The source for this consolidated reference is the official Bureau of Indian Standards (BIS) section titled Products under Compulsory Certification, including its Scheme I, Scheme II, Scheme IV and Scheme X registers. BIS mentions that certification is generally voluntary, while products can be made compulsory by the Central Government for reasons including public interest, health and safety, environmental protection, prevention of unfair trade practices and national security.

Official BIS Reference - <https://www.bis.gov.in/product-certification/products-under-compulsory-certification/>

For compliance: Identify the exact product and its technical characteristics first; then confirm the current Indian Standard, QCO / statutory instrument, conformity-assessment scheme, exemptions or transition provisions, testing requirements and marking/registration requirements applicable to that product.
